Executive Summary

Small business owners across Nevada are doing everything they can to fortify their businesses in our slowly recovering economy. In communities across the state, it is the jobs small businesses provide and the consumers they serve that keep our recovery moving. However, this recovery is threatened when small businesses are faced with costly and frivolous lawsuits brought on by patent assertion entities—commonly referred to as patent trolls. According to a scientific opinion poll conducted for Small Business Majority, small businesses support proposed changes to the U.S. patent system that would help prevent patent trolls from targeting small businesses.

Patent assertion entities are companies that don't make or sell anything of their own; they purchase relatively ambiguous patents and then demand royalty payments for use of their technology, or immediately file lawsuits against firms they believe are infringing on their intellectual property. This situation is not just faced by companies that manufacture or sell technology: it also affects end users of common technologies, such as a coffee shop offering WiFi to their customers.

Small business owners understand that in order to prevent these attacks, reform is needed to strengthen the U.S. patent system. Our polling found Nevada entrepreneurs show strong support for many proposed changes to the country's patent system.

For example, Nevada small businesses believe they should be protected from patent trolls by requiring them to sue the party that is actually responsible for infringement, not the end users who had no input into the product. More than three-fourths (78%) support this provision, and more than half (52%) strongly support it. Additionally, more than three-fourths (76%) of small business owners believe patent trolls should be deterred from attacking small businesses in the first place by penalizing them for filing fraudulent patent assertions or sending abusive demand letters. Eighty-two percent believe courts should impose financial sanctions against patent trolls that file baseless lawsuits.

In the case that a small business must go to court to fight a patent troll, more than two-thirds (68%) support a provision that would allow courts to require the loser in a frivolous patent case to pay the winning side's fees and costs. What's more, a vast 82% support a provision that would require more transparency in patent lawsuits by requiring plaintiffs to disclose who the owner of a patent is before litigation, so that it is clear who stands to benefit financially from the lawsuit. More than half of entrepreneurs (56%) showed *strong support* for this provision.

Small employers also showed particularly strong support for a provision that would reduce the cost of discovery in patent lawsuits. Eighty-five percent of entrepreneurs support the creation of new judicial rules to reduce the costs of discovery in patent litigation, so that high legal fees do not force small businesses and entrepreneurs to settle out of court when they don't need to.

Small employers also agree that improvements should be made to the U.S. Patent Office in order to help prevent abuse of the system. More than half (55%) of entrepreneurs believe the U.S. Patent Office should be fully funded so there is closer scrutiny of patent applications. What's more, a vast 84% support expanding patent review opportunities to prevent patent trolls from threatening small businesses with patents that were questionable in the first place. More than seven in 10 (72%) support creating a system to trigger automatic reviews of patent that are commonly exploited by patent trolls.

It's important to note the respondents were politically varied and were in fact a Republican plurality—with 47% of small business owners identifying as Republican, 28% as Democrat and 17% as independent.

Main Findings

- The vast majority of Nevada entrepreneurs believe end users should be protected from frivolous patent lawsuits: More than three-fourths (78%) of small businesses believe they should be protected from patent trolls by requiring them to sue the party that is actually responsible for the infringement, not the end users who had no input into the product. More than half (52%) of respondents *strongly support* this provision.
- Small businesses agree the loser in a frivolous patent case should pay the winner's fees: More than two-thirds (68%) support a provision that would allow courts to require the loser in a frivolous patent case to pay the winning side's fees and costs.
- Small businesses agree patent trolls should be penalized for fraudulent patent assertions or abusive demand letters: More than three-fourths (76%) of small business owners believe patent trolls should be deterred by penalizing them for filing fraudulent patent assertions or sending abusive demand letters. Eighty-two percent believe courts should impose financial sanctions against patent trolls that file baseless lawsuits.
- Small business owners support more transparency in patent lawsuits: 82% of small employers support a provision that would require more transparency in patent lawsuits by requiring plaintiffs to disclose who the owner of a patent is before litigation, so that it is clear who stands to benefit financially from the lawsuit. More than half of entrepreneurs (56%) showed *strong support* for this provision.
- Entrepreneurs overwhelmingly support a provision that would reduce the cost of discovery in patent lawsuits: 85% of entrepreneurs support the creation of new judicial rules that would reduce the costs of discovery in patent litigation, so that high legal fees do not force small businesses and entrepreneurs to settle out of court when they don't need to.
- Small employers support making improvements to the U.S. Patent Office: More than half of entrepreneurs (55%) believe the U.S. Patent Office should be fully funded so there is closer scrutiny of patent applications.
- Entrepreneurs support expanding review opportunities for patents: A vast 84% support expanding patent review opportunities to prevent patent trolls from threatening small businesses with patents that were questionable in the first place. More than seven in 10 (72%) support creating a system to trigger automatic reviews of patent that are commonly exploited by patent trolls.
- **Respondents were a Republican plurality:** 47% identified as Republican, 28% as Democrat and 17% as independent or other.

Small Employers Strongly Support Proposed Changes to U.S. Patent System

Small businesses showed strong support for many patent reform proposals that are intended to deter malicious attacks by patent trolls.

Small businesses believe they should be protected from patent trolls by requiring them to sue the party that is actually responsible for infringement, not the end users who had no input into the product. More than three-fourths (78%) of entrepreneurs support this provision, with more than half (52%) who *strongly support* it. Additionally, 76% of small business owners believe that patent trolls should be deterred from attacking small businesses in the first place by penalizing them for filing fraudulent patent assertions or sending abusive demand letters. Eighty-two percent believe courts should impose financial sanctions against patent trolls that file baseless lawsuits.

Figure 1: Entrepreneurs agree end users of common technologies should be protected from patent infringement lawsuits

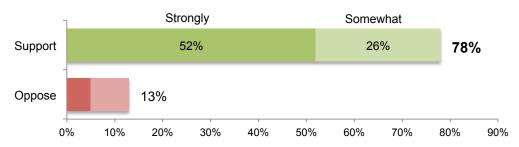

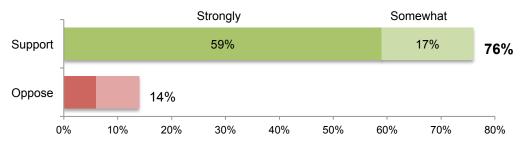

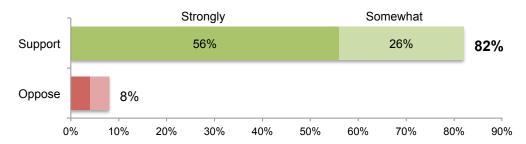

Figure 2: Small business owners believe patent trolls should be deterred from filing fraudulent patent assertions or sending abusive demand letters

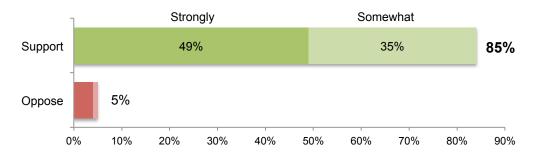

In the case that a small business must go to court to fight a patent troll, a vast 82% support a provision that would require more transparency in patent lawsuits by requiring plaintiffs to disclose who the owner of a patent is before litigation, so that it is clear who stands to benefit financially from the lawsuit. More than half of entrepreneurs (56%) showed *strong support* for this provision.

Figure 3: Small employers support more transparency in patent lawsuits by requiring plaintiffs to disclose information about the patent's owner

Small employers also showed particularly strong support for a provision that would reduce the cost of discovery in patent lawsuits. Eighty-five percent of entrepreneurs support the creation of new judicial rules to reduce the costs of discovery in patent litigation, so that high legal fees do not force small businesses and entrepreneurs to settle out of court when they don't need to.

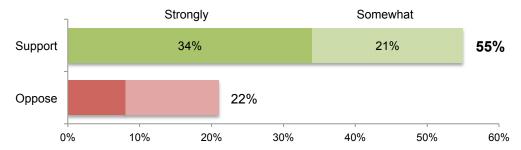

Figure 4: Entrepreneurs support rules to reduce the costs of discovery in patent litigation, so high legal fees do not force them to unnecessarily settle out of court

Small businesses also agree the loser in a frivolous patent case should pay the winner's fees. More than two-thirds (68%) support a provision that would allow courts to require the loser in a patent case to pay the winning side's fees and costs.

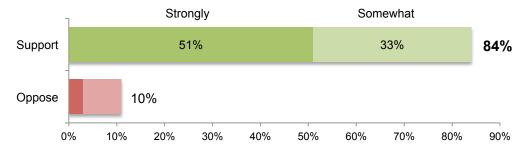

Small employers believe improvements should be made to the U.S. Patent Office in order to help prevent abuse of the system. More than half (55%) of entrepreneurs agree the U.S. Patent Office should be fully funded so there is closer scrutiny of patent applications.

Figure 5: Nevada small businesses support improving the U.S. Patent System to help prevent abuse of the system

What's more, a vast 84% support expanding patent review opportunities to prevent patent trolls from threatening small businesses with patents that were questionable in the first place. More than seven in 10 (72%) support creating a system to trigger automatic reviews of patent that are commonly exploited by patent trolls.

Figure 6: Small business owners believe the patent review system should be expanded to prevent patent trolls from threatening small firms

Conclusion

Small businesses are the backbone of our state's economy and create the vast majority of new jobs. As these poll findings make clear, they believe patent trolls take advantage of the patent system and support many patent reform proposals that would help prevent this type of abuse.

Small businesses support specific provisions within patent reform legislation because they believe it would improve the system by making patent lawsuits more transparent, protect end users of common technologies from frivolous lawsuits and deter patent trolls by penalizing them for sending abusive demand letters. Nevada entrepreneurs support changes to the patent system because it would help protect the small business community and allow them to continue to grow and create jobs, therefore helping to strengthen our economy even more.

Methodology

This poll reflects a telephone survey of 100 Nevada small business owners, conducted by Lake Research Partners and Chesapeake Beach Consulting for Small Business Majority with a margin of error of \pm 0.8. The survey was conducted from April 7-23, 2014.

Respondents were provided with the following description of patent assertion entities prior to this question: Now, as you may know, patent assertion entities – sometimes called PAEs or patent trolls – are companies that don't make or sell anything of their own; they just own patents. They often purchase vague or generalized patents covering commonly used technology such as Wi-Fi, scanners, or e-commerce tools, and then demand annual fees for use of that technology – or immediately file lawsuits against companies they claim have infringed on their intellectual property. This is a situation that an end user of technology can face, such as a coffee shop offering Wi-Fi to their customers, not just faced by companies that manufacture and sell technology.
