Methodology

This poll reflects a survey of 1,000 likely 2026 general election voters nationwide. The poll was designed and administered by Lake Research Partners, and was conducted between February 23 – March 2, 2026, by live telephone and text-to-online interviews in English and Spanish.

The sample was stratified by gender, age, region, race and political affiliation to reflect the demographic composition of likely midterm voters. Where there were slight differences between our survey sample and the expected voting population, data were weighted accordingly. The margin of error for the full sample is +/- 3.1% at a 95% confidence level. It is larger for subgroups and split-sampled questions.

a. [CORPORATIONS/TAXES] Small businesses are the backbone of our economy and our communities, but today many are struggling. We need elected leaders who will stand up and fight for small businesses, not wealthy corporations and monopolies. We need fair regulations that rein in monopolies and level the playing field and a tax system that rewards small businesses rather than punishing them.

b. [REGULATIONS] For small businesses with fewer resources and employees, navigating bureaucracy and regulations is nearly impossible. To help small businesses thrive, we need to cut burdensome red tape that limits competition and prevents small businesses from getting government contracts, while also ensuring that regulations of large corporations are enforced and the rules apply fairly.

c. [TARIFFS] Small businesses need stability and fairness to compete with larger corporations, but constantly changing tariffs that drive up costs make it harder than ever for small businesses to keep up. While large corporations can absorb the cost, pass it on to consumers, or negotiate exemptions, small businesses work on the margins and don't have the flexibility to deal with ever-changing tariff costs.

d. [IMMIGRATION – STARTING SMALL BIZ] We know small businesses are vital in our communities, and immigrants are twice as likely to start a small business in their community than other Americans. Instead of ICE agents rounding up immigrants, we need to empower legal immigrants to start and work for small businesses so we can create more jobs, grow our local economies, and revitalize the American dream for all of us.

e. [IMMIGRATION – WORKFORCE] We know small businesses are vital in our communities, and immigrants here legally are a vital part of the workforce that keeps small businesses operating. Instead of eroding opportunity for immigrants here legally, we need to empower all Americans, including immigrants, to start and work for small businesses to create more jobs, grow our local economies, and revitalize the American dream for all of us.

f. [HEALTHCARE] Small businesses try to provide employment and benefits like healthcare, childcare, and family leave to millions of Americans. Americans deserve quality affordable healthcare, but today small business owners are struggling to provide what their families and employees need and deserve. We need to fight to lower the cost

g. [CHILDCARE] The ever-increasing cost of childcare harms small businesses. Owners and their workers who are parents struggle to be productive if they have to juggle complex childcare needs. We need to ensure affordable access to childcare so that we can strengthen our small business economy and allow parents to provide for themselves and their children.

h. [ENTREPRENEURSHIP/SELF-EMPLOYED] Many Americans dream of starting a small business, but our system favors wealthy corporations and monopolies instead. Owning a small business empowers individuals and communities, building wealth and supporting local economies. Elected leaders should support those who want to start small businesses by leveling the playing field, making capital accessible to startups, and passing policies that allow anyone to pursue the American Dream.

j. [PATRIOTIC] Small businesses are the backbone of our country and our communities. As we celebrate the 250th anniversary of our country, we should affirm that there's nothing more American than thriving small businesses. We need to fight for policies that invest in and prioritize small businesses so we can help the next generation of Americans start their own small businesses.
